RELATIONSHIP-BASED APPROACH

We focus on developing and building long term relationships with our key clients. We get to know our customers' businesses intimately, and partner with them to help them achieve their objectives. We call this approach client advocacy.

Working in step with our customers, this strategy enables us to expand our end markets, capabilities and geographies as we grow consistently over time. Our approach to risk, our low cost of sales, our constant innovation, and our deep knowledge of our clients' drivers and goals allows us to provide measurable value.

More than 94% of our business is from repeat customers: many we've been with for decades, and others we gain through acquisition and expansion into new markets and geographies. Our business strategy continues to yield advantages for all of our stakeholders: value, quality, expertise and advocacy for our clients; steady, consistent, profitable growth for our shareholders; and abundant opportunity for our employees, who represent the industry's top talent.

COMMITMENT TO SAFETY

At Jacobs we are dedicated to keeping our employees safe, healthy, and working towards bright futures. BeyondZero, our program that promotes a culture of caring, aims far beyond the goal of an Incident and Injury-Free® workplace.

It aims at something deeper, a true culture of caring where concern for employees' health, safety and welfare extends outside the office walls, beyond the project site and into our homes, our cars, and all the places where we interact with friends and family. BeyondZero® and our culture of caring is about the true safekeeping of our employees, their families, our clients and our communities. COMMITMENT TO SUSTAINABILITY

Jacobs publishes an annual *Sustainability Report*. It can be downloaded from www.jacobs.com.

As an experienced provider of sustainable practices, Jacobs works with clients to reduce their environmental footprint. As business partners to our clients, we focus on delivering the tangible, technical solutions that make a real difference to our clients' triple bottom line. We have the expertise to progressively and cost-effectively reduce the environmental impact and resource intensity of projects around the world.
